Chevelle Malibu Sport Coupe

No matter how you look at it, this car makes a lot of sense.

If you're interested in value (and who isn't), the eleven features above give you a good idea why more intermediate-size car buyers are thinking Chevelle.

If you're looking for a wide power choice, Chevelle starts out with a standard 120-hp Six, an ideal city performer. After that you may order from a variety of engines that turn it into an even greater highway performer.

Room? Large door openings. Wide curved side windows for extra shoulder room. Great front and rear leg room. Those four, five or six passengers have it made. And so do you. Chevelle may seat like a big car but it handles like a smaller car.

Comfort? Thick wall-to-wall carpeting in Malibu models. Foam-cushioned seats. Easy-to-read instrument panel. The whole interior looks like those in cars costing far more.

Come on down to our showroom and take a drive soon. Chevelle begins to make even more sense after you've gone a couple of miles.

It's not time to plant corn, but it is time to be giving some thought to damage you may expect from soil insects. The three principal insects are: Southern Corn Rootworm, Seed Corn Maggot and Wirewarms. Last year, we found the Sod Web Worm heavily damaging corn. These insects are controlled by using (1) Diazinon in the granulated form, (2) Diazinon as a spray, (3) seed treatment before corn is planted. The first two are recommended only on heavy soils or when previous injury has been experienced. Detailed information on this subject is available in leaflet form.

Each year many farmers buy seed from a neighbor. There's a good possibility that it hasn't been treated. Spring Oats are now being seeded — be sure they are treated with a mercury compound such as Ceresan or Panogen. Considerable loss has been experienced in the past few years from smuts and blights. Don't gamble — the extra cost is certainly worth while!

In the 1964 Canteloupe production trials at V.P.I., the best early varieties were Harper, Hybrid, Burpee Hybrid and Gold Star Hybrid. Saticoy was the best late maturing variety. Melons grown on black plastic, matured 10 days earlier than the same varieties not raised on black plastic.

"The South 40" by JAMES A. SMITH COUNTY AGENT

In talking with Bill Williamson and his father the other day, they told me that they have found several spots in their pines that have been killed by the pine beetle. Several weeks ago we talked at length about this problem in Piedmont Virginia. If you own pine land and haven't looked it over closely — you owe it to yourself to get it done right away. These pines must be cut to control the insect. Now is a good time to do it before the egg laying cycle begins and more trees are affected.

The new Chemical Weed Control Guide is available. There are a number of new materials being recommended for the first time this year. They will save work. A weed-free crop returns more money. Lawns can look "ragged" this time of year with onion or wild garlic showing up. These can be easily controlled with 2,4-D. The same is true with small grain and pasture. Over the years, dairymen have sold milk at reduced prices because of off - flavors. 2-4-D is inexpensive — but a boom sprayer is necessary. For lawns, a small garden sprayer will do a good job. Tobacco growers should take a look at Diphenamid for weed control in the field. It must be applied following transplanting. Weeds are probably the biggest problem in Soybean production. There is a new pre-plant herbicide recommended this year. Several days ago, I was talking with a homeowner who had henbit and chickweek in his lawn. I suggested he try Silvex in water — one gallon per 1000 square feet. Later he said "You know, it's nearly impossible to get a gallon of water to cover a thousand square feet." Others may have experienced the same problem. It doesn't make a great deal of difference about the water. It's only a carrier. The amount of chemical to a given area is what's important.

Birds appear to be becoming more and more of a pest in small grain, corn and grain sorghum. A series of seven meetings will be held over the state. Closest one to us will be in Charlottesville on April 1. If you are finding birds to be a problem you were Mr. L. M. Woodson of Lynchburg, Mr. A. G. Hancock and Charlie Bagby.

Friends of Mr. and Mrs. J. E. Stanley wish to welcome them back to their home in Appomattox.
